

TAILOR MADE STYLE

Parà presents TempotestStar Home FR®, an outdoor flame retardant fabric with printing possibility

TempotestStar Home FR® is fabric made with an innovative 100% PET outdoor solution dyed inherent Flame Retardant fibre. TempotestStar Home FR® is offered in a choice of 12 solid colors. The novelty of this product is the "Tailor Made" printing service. In order to meet the increased flexibility required by the market the service is available to customers for small quantities, Parà is able to offer the ability to print on colors White [7015/100] and Beige [7929/100] your custom designs and create hundreds of variations. TempotestStar Home FR® fabric digital printed is revolutionary in the world of outdoor furniture. The customized fabric designs will allow customers the ability to personalize gardens, balconies, swimming

pools and all outdoor spaces. The fabric's characteristics make it particularly suitable for use in public areas such as hotels, bars, restaurants and public buildings. Tempotest-Star Home FR® keeps the characteristics of all Tempotest Home fabrics of high-tenacity, excellent colourfastness to sunlight and resistance to UV rays. The Teflon EXTREME treatment by Parà results in the fabric being water and oil-repellent, stain and salt resistant, and anti-mold. It is also classified FR and certified in accordance with the most strict European and U.S. standards, as well as the IMO conformity which is essential for the use of the fabric in the nautical field.

TempotestStar Home FR® is a mix of Tempotest performance and your style...100% Made in Italy.
